

Jacky Lin

yl1000@duke.edu | linkedin.com/in/jackylinhelpsualot | github.com/jackyissocute | Suzhou, China / Durham, NC

EDUCATION

Duke Kunshan University & Duke University — Dual Degree Program

B.S. Molecular Bioscience: Biophysics Track; B.S. Molecular Biophysics / Interdisciplinary Studies

Class of 2027 | Kunshan, China & Durham, NC

Relevant Coursework: Python, Probability & Data with R, Linear Algebra, Molecular Biology, Modern Physics, Thermodynamics

RESEARCH & AI PROJECTS

Kappes Lab, Duke Kunshan University

Biotechnology Laboratory Assistant / DEK Supercoiling Project Lead | Suzhou, China | Feb 2024–Present

- Lead a 5-person study on pseudo-SAP/SAP box-mediated DNA supercoiling by the human DEK oncoprotein under Prof. Ferdinand Kappes.
- Conduct molecular biology experiments, protein purification, PCR, ImageJ/statistical analysis, and manuscript preparation for MicroPublication review.
- Won Gold Medal at DKU Summer Research Conference and Dean-nominated best-group recognition.

Protein–Li⁺ / Bacteria-Battery Research Direction

AI-assisted Research & Modeling Project | Kunshan, China | 2025–Present

- Use Codex and AI-agent workflows to structure literature review, generate analysis scripts, and compare protein–lithium affinity hypotheses.
- Document battery-recovery experiments and computational modeling logic for reproducible research workflows.

Pfizer & Extern

AI Document Intelligence Extern | Remote | May 2026–Present

- Build Python-based pipelines for pharmaceutical-label OCR, PDF extraction, and structured field parsing.
- Prototype RAG search tools for compliance documents, focusing on reliable extraction of dosage, lot numbers, and regulatory indicators.
- Apply prompt engineering and Codex-style AI-agent workflows to automate parsing, validation, documentation, and NLP/computer-vision iteration.

CLINICAL & PROFESSIONAL EXPERIENCE

BenQ Corporation / Suzhou Municipal Hospital

Radiation Therapy & Oncology Intern | Suzhou, China | Dec 2023–Mar 2024

- Assisted with PET-CT scanning, patient communication, contouring, treatment planning, and radiotherapy workflow observation.
- Supported annual QC/QA for CT scanner and Varian EDGE/TrueBeam systems; learned clinical roles across physicists, physicians, and therapists.

DKU Innovation Lab

InLab Assistant | Kunshan, China | Sep 2023–May 2024

- Supported peer prototyping from CAD models to finished 3D prints using Fusion 360, Blender, slicing software, and printer QC.
- Hosted workshops and monthly activities on VR/AR, Swift, and 3D printing; created outreach posters and social-media articles.

DKU iGEM

Project Assistant | Suzhou, China | Oct 2024–Sep 2025

- Supported PCR and experimental planning for a student synthetic-biology project.

ADDITIONAL INFORMATION

Technical: Python, R/RStudio, MATLAB, Excel, ImageJ, OCR, RAG, prompt engineering, Codex/AI agents

Research/Lab: Molecular biology, protein purification, PCR, organic chemistry lab, PET-CT, contouring, radiotherapy planning, QC/QA

Design/Prototyping: Fusion 360, Blender, 3D printing

Certifications: Probability and Data with R; CITI Undergraduate Student Responsible Conduct of Research

Languages: Mandarin Chinese, English
